Project Name	ToyCraft tales: tableau's vision into toy manufacturer data
Maximum Marks	4 Marks

Step-1: Team Gathering, collaboration and select the problem statement

The screenshot shows a digital template for a brainstorming session. On the left, a vertical sidebar labeled "Template" features a blue decorative bar at the top. The main content area is divided into three columns:

- Left Column:** Contains a circular icon with a lightbulb inside, followed by the title "Brainstorm & idea prioritization". Below the title, a paragraph encourages users to use the template for their own sessions. It includes a timer icon (10 minutes), a person icon (1 hour), and a group icon (2-8 people). A "Template" label is also present.
- Middle Column:** Titled "Before you collaborate", it contains a brief introduction and a 10-minute timer. It lists three steps: "Team gathering" (Define who should participate and send an invite), "Set the goal" (Think about the problem to solve), and "Learn how to use the facilitation tools" (Use Superpowers). A "Open article" button is available for the facilitation tools section.
- Right Column:** Titled "Define your problem statement", it asks users to frame their problem as a "How Might We" statement. It includes a 5-minute timer and a "Problem" section describing the challenge faced by toy manufacturers. A "Key rules of brainstorming" box lists six rules with icons: Stay in topic, Encourage wild ideas, Defer judgment, Listen to others, Go for volume, and If possible, be visual.

Group ideas

Take turns sharing your ideas while clustering similar or related notes as you go. Once all sticky notes have been grouped, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you can break it up into smaller sub-groups.

⌚ 20 minutes

TIP
Add a sticky note to stick notes in one cluster to keep them together or separate them across multiple clusters.

Step-3: Idea prioritization

4 Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

⌚ 20 minutes

TIP
Participants can use their cursor to point at where sticky notes should go on the grid. They can also click and drag them to a spot by using the laser pointer holding the H key on the keyboard.

Importance
In which of these areas could we get done without any extra effort, or which areas have the most positive impact?

Feasibility
Regardless of their importance, which tasks are more feasible than others? (Cost, time, effort, complexity, etc.)
